

Notice of Allowability	Application No.	Applicant(s)
	10/661,332	MOMIUCHI, MASAYUKI
	Examiner & 1	Art Unit
	Tod T. Van Roy	2828
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>01/03/2006</u> .		
2. X The allowed claim(s) is/are <u>2-12 and 15-17</u> .		
3. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a)		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☑ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☑ Information Disclosure Statements (PTO-1449 or PTO/SB/0 Paper No./Mail Date 4. ☑ Examiner's Comment Regarding Requirement for Deposit of Biological Material	6. ☐ Interview Summary Paper No./Mail Da 08), 7. ☐ Examiner's Amend	te

DETAILED ACTION

Response to Amendment

The examiner acknowledges the amending of claims 2-12, and 15-16, as well as the cancellation of claims 1, and 13-14.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art such as US 5369661 and US 5513201 were found to teach the polarization element as added by the applicant's amendment, but failed to teach proper placement of the device in the overall system.

Allowable Subject Matter

Claims 2-12 and 15-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 2 is allowable as a semiconductor laser device comprising a light emitting unit which has an array of emitters having beams entering the resonator independently to pump a solid state gain medium, upon which a reflection mirror is formed, and an output mirror is joined via a gap, having at least two of such units, and combining the outputs of the individual units (having different output polarization directions) into a polarization element which passes one beam set and reflects the other such that the outputs are superimposed, was not found to be taught in the prior art or be an obvious

combination of the prior art. Prior art such as US 5369661 and US 5513201, were found to teach the polarization element, but in each of these systems the element is in place prior to the beams entering the resonator, not at the output of the outcoupling mirror, not meeting the claim limitations, and additionally, would not keep the beams independent before they enter the resonator.

Claim 3 is allowable for the same reasons as claim 2, and contains additional limitations such as fiber bundles.

Claims 4-12, and 15-17 are allowable as they depend directly from claims 2 and 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tod T. Van Roy whose telephone number is (571)272-8447. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun Harvey can be reached on (571)272-1835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
